

Locators • smooth, for spring plungers

22020.0010

Product Description

Locators can be used as a counterpart for all spring plungers with ball. They enable the locking, latching and positioning of the respective workpiece. These smooth locators have a 90° countersink. Thanks to the hardened material, the locators are low-wear and particularly suitable for applications with many repeat cycles.

Material

- Steel, hardened, ground
