

Flat Knurled Thumb Screws • DIN 653

24770.0536

Product Description

Knurled thumb screws are very versatile. Three material versions for the different requirements

- steel, blackened
- steel, zinc-plated by galvanization
- stainless steel

are available.

Knurled thumb screws can be easily tightened and released by hand. The ribbed outer surface of the nut prevents slipping when tightening / releasing with the fingers.

The thread is manufactured up to the head and with runout without undercut at the end of the thread (DIN designation A). The screws can therefore not be screwed in up to the head.

Material

- Steel, zinc-plated by galvanization, quality 5.8

More information

Notes

Knurling pitch and knurling depth may differ from DIN.

Further products

- High Knurled Thumb Screws, DIN 464
