# Spring Plungers • smooth, without collar, with moveable ball

# **Product Description**

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart.

Another advantage of the plastic ball is the electric insulation.

### **Material**

# **Body**

• Stainless steel 1.4305

### **Bearing**

· plastic

### Ball

· Stainless steel, hardened

### Spring

· Stainless steel

### **Assembly**

The locating hole has to be adapted to each individual application case. We recommend an F8 size location hole for easy assembly and a H9 size when tight fit is required.

### More information

### **Notes**

Special types on request.

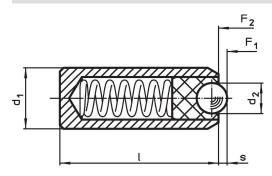

Spring plungers are specially tested for spring range and forces.

Calculation of indexing resistance, please refer to appendix - Technical Data -
