

Index Bolts • threadless, weldable EH 22120.

Product Description

Index bolts are used for indexing purposes.
This index bolt made of steel or stainless steel is available in two versions.

- riveted
- screwed

Material

Locking pin

- Steel, zinc-plated by galvanization, passivated
- Stainless steel 1.4401

Assembly

We recommend the screwed version for welded joints. The final assembly of the index bolt can then take place after the body has been welded:

1. Weld on body (3)
2. Place the spring (2) on the locking pin (1) and insert it into the body (3)
3. Tighten the bolt (4) with the screw (5) on the locking pin (1)

The riveted version is also suitable for fastening by welding. However, care must be taken to ensure that the effect of heat is limited (e.g. by fixing with weld spots) and that there are no structural changes to the spring and bolt.

Operation

By turning the index bolt 180° the locking pin will be pulled-in and secured by a notched catch (when locking pin should not overhang).

Application example

Compliance

RoHS compliant

Compliant according to Directive 2011/65/EU and Directive 2015/863.

Does not contain SVHC substances

No SVHC substances with more than 0.1% w/w contained - SVHC list [REACH] as of 23.01.2024.

Does not contain Proposition 65 substances

No Proposition 65 substances included.
