SIMPLEX hickory handle • for SIMPLEX sledge hammers with cast iron housing

Product Description

Made from hickory wood, the ergonomic and varnished wooden handles of the series 3244 are paired with SIMPLEX sledge hammers that come with a cast iron housing and range in size from D60mm to D140mm. The handles for the D60mm and D80 sledge hammers are 70cm long, while the length of the handle for sizes D100mm, D125m and D140mm is 90cm. Hickory is a type of wood with an extra long fibre structure, which contributes to the great stability of the handle. This structure also keeps the handles from ever breaking in two completely and ensures that both pieces remain connected. This prevents injuries caused by hammer heads that have come off. In line with the smart SIMPLEX principle, all components can be retrofitted. This translates to savings in both money and resources.

Product features:

- High-quality hickory handles for SIMPLEX sledge hammers with cast iron housing and sizes from D60mm to D140mm.
- Length of 700mm / 90mm.
- · Shaped ergonomicallyVarnished.
- · Long-fibre, ultra durable.
- · Safety-relevant (will not break in two).
- · Can be retrofitted, resulting in great savings in cost and resources.
